## How to set up your S-pushTan-App

## Only start setting up your pushTan-App if you have all of your login data!

## You need to have:

- your login name ("Anmeldename")
- a Start-PIN (for new users) or your personal OnlineBanking-PIN and:
- a letter for registration "Registrierungsbrief" (document with a QR-Code) or a registration-SMS including a link. You can request either of those on our website (www.spkhb.de)

Download the

Download the app "pushTan" from your AppStore / Google Play Store

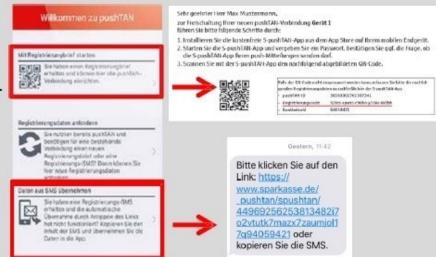

Open the app and create a new password

(at least 8 digits, MUST contain letters, numbers and special characters)

QR-Code
Tap the QR-Icon,
allow acces to your
camera and scan the QRCode

SMS-Code
If you received an SMS,
open the link by tapping
on it and selecting "Open
with S-pushTan"

4

This is the code to register your app. We recommend to write it down for use in Step 6.

Open our homepage (www.spkhb.de) and use your login name (Anmeldename) and the Start-PIN to acces your Online-Banking. Both can be found on the documents provided.

After you logged in, click on 'Jetzt freischalten' ("unlock now") and enter your registration code (from Step 4). Then click on 'Freischalten' ("Unlock").

You have completed the registration.

You will have to change your Start-PIN in the next step. The confirmation code will be sent to your pushTan-App automatically.
